## What is DiveRecorder?

**DiveRecorder** is the core program in a suite designed to manage the entire Recording function for springboard and platform diving meets. It can be used at every level from local club events to international meets under FINA Rules. If you ever combine events, run two or more concurrently, want to have an online scoreboard showing dive-by-dive scores - then you should look at DiveRecorder.

The FINA Diving Rules for 2017-2021 came into effect from 13 September 2017 for FINA events. These are supported by Version 7.0.0.0 and greater of the DiveRecorder software.

## Main Supporting Applications

**DiveSheets** is a program used by participating clubs or trainers for the bulk preparation and submission of dive sheets over the Internet so that they may be conveniently imported by DiveRecorder.

**DRUtilities** is a collection of programs for scoreboards, live web results and the like.

**JPad Utility** is a program designed to configure or test MazingTree's wireless judging keypads (JPads)

**MTE Test** is a program designed to configure or test Swiss Timing's judging keypads (MTEs)

## Online Divesheets

This method of submitting divesheets has been designed for use by individual divers. If you are a club coach or administrator wishing to submit dive sheets for a number of divers you should instead download, install and use the program **DiveSheets** as it is better suited for that purpose. For more information on DiveSheets, [click here](#).

If you are an individual diver, you will need to take the following steps to complete and submit your dive sheets for a Meet:

1. Select a Meet
2. Enter your details: name, club, etc
3. Choose an Event
4. Fill in your dive sheet
5. Repeat steps 3 and 4 for each event you have entered
6. Check and make any necessary corrections
7. Finally, Submit your sheets .. or Abort

Note that you can Abort at any time before actually 'submitting' your sheets.
